EDUCATION

Newton School of Technology — Rishihood University 2026 — 2030

B.Tech in Computer Science and Engineering (Artificial Intelligence) Sonipat, Haryana, India

- Core engineering coursework in algorithms, data structures, full-stack architectures, and applied artificial intelligence.

TECHNICAL SKILLS (VERIFIED VIA GITHUB PROFILE)

Languages:	Python, C++, C, JavaScript, TypeScript, Java, Bash
Frontend & UI:	React, Next.js, HTML5, CSS3, AngularJS, CanvasJS
Backend & Cloud:	Node.js, Django, Flask, Firebase, Microsoft Azure, Docker
AI, Data & Databases:	PyTorch, Pandas • MongoDB, MySQL, SQLite, MS SQL Server, Oracle
Mobile, Robotics & Tools:	React Native, Flutter, Arduino, Android • Git, Linux, Figma, Blender, Unity

ACTIVITIES & INVOLVEMENT

ARTHAKRAM — Product Consultation Club — *Core Member* 2026 — Present

- Conduct structured digital product teardowns, UX/market case studies, and business strategy analyses with peer builders at Newton School of Technology.

NEWTONBOTICS CLUB — Robotics & Hardware Club — *Technical Member* 2026 — Present

- Engineer hands-on embedded systems, microcontroller circuits (Arduino), motor drives, and sensor networks at Newton School of Technology.

Fetch-A-Thon 3.0 — Masters' Union — *Top 20 Recognition* 2026

- Built **OrderShield AI**, an automated procurement vendor verification platform validating documentation compliance across national teams.

HackO'Ween (IITM Murthal) & CoNSTruct 2.0 (Replit x NST) — *Core Builder* 2026

- Developed **Converge** (Smart City complaint triage platform) and **Blindspot AI** (operational gap detection engine).

IIM Product Challenge & IIT Roorkee eSummit — *Participant / Strategist* 2024 — 2026

- Engaged in competitive product ideation challenges and tech innovation summits; analyzed scalable startup case studies.

SELECTED TECHNICAL PROJECTS

CONVERGE — Smart City Intelligence Platform *Python, FastAPI, React, Data Classification*

- Municipal grievance management platform improving civic triage, severity prioritisation, root-cause clustering, and citizen feedback loops.

BLINDSPOT AI — Contextual Anomaly Detection *Python, Modern Web UI, System Prompts, React*

- AI-driven product created during CoNSTruct 2.0 to detect operational blindspots and deliver structured diagnostic insights.

ORDERSHIELD AI — Supplier Onboarding Verification *Python, REST APIs, Document Verification Logic*

- Automated vendor due diligence system cross-validating supplier compliance credentials to accelerate trusted B2B procurement.

SESAME ROBOT — Autonomous Robotics & Embedded System *C, C++, Arduino, Microcontrollers, Sensors*

- Hands-on robotics engineering project integrating ultrasonic/infrared obstacle detection with real-time microcontroller motor control.

JARVIS — Personal AI Assistant *Python, Automation Scripts, System APIs, Bash*

- Lightweight workstation automation assistant streamlining local developer operations and contextual task execution.
