ANTRIKSH GALHOTRA

Computer Science & AI Undergraduate | Developer | Product Enthusiast

India • antriksh.codes@outlook.com • github.com/Antrikshcodes • linkedin.com/in/antriksh-galhotra

EDUCATION

Newton School of Technology — Rishihood University 2026 — Present

B.Tech in Computer Science and Engineering (Artificial Intelligence) — First Year Sonipat, Haryana, India

• Rigorous computer science foundation focused on algorithmic problem solving, modern software architectures, and AI engineering.

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS

Developer Tools: Git, GitHub, React (applied in modern web UIs), Linux/macOS CLI

Areas of Focus & Interest: Artificial Intelligence, Machine Learning, Robotics (Microcontrollers/Sensors), Product Development, UI/UX

EXPERIENCE, HACKATHONS & ACTIVITIES

Fetch-A-Thon 3.0 — Masters' Union — *Top 20 Recognition* 2026

• Developed **OrderShield AI**, a vendor verification platform automating procurement due diligence and risk assessment across institutional supplier pipelines.

HackO'Ween — ALTA School of Technology, IITM Murthal — *Core Builder* 2026

• Engineered **Converge**, an intelligent municipal complaint management platform featuring severity ranking, automated clustering, and citizen feedback loops.

CoNSTruct 2.0 — Replit x Newton School of Technology — *Hackathon Developer* 2026

• Built **Blindspot AI**, an intelligent platform identifying latent operational friction and surfacing prioritized insights.

ARTHAKRAM (Product Consultation Club) — *Active Member* 2026 — Present

• Analyze product teardowns, design thinking frameworks, and strategic product requirements with peer engineering cohorts.

IIT Roorkee eSummit & IIM Product Challenge — *Participant / Strategist* 2024 — 2026

• Engaged in competitive product ideation challenges and tech innovation summits; explored real-world user workflows.

SELECTED TECHNICAL PROJECTS

CONVERGE — Smart City Intelligence Platform *Python, FastAPI, React, Data Classification*

• Urban governance platform improving municipal complaint triage, severity prioritization, and transparent citizen communication.

BLINDSPOT AI — Contextual Anomaly Detection *Python, Modern Web UI, System Prompts*

• AI-powered product identifying overlooked operational blindspots and delivering actionable diagnostic summaries.

ORDERSHIELD AI — Supplier Onboarding Verification *Python, REST APIs, Document Verification Logic*

• Automated due diligence system cross-validating vendor compliance credentials to accelerate trusted B2B procurement.

SESAME ROBOT — Autonomous Robotics System *Embedded C/C++, Microcontrollers, Motor Controllers, Sensors*

• Physical robotics project integrating ultrasonic and infrared sensors with real-time microcontroller-driven motor control logic.

JARVIS — Personal AI Assistant *Python, Automation Scripts, Speech & System APIs*

• Lightweight workstation automation assistant streamlining local developer operations and contextual task execution.
